Interpretation

In this essay writer trying to tell us that importance of education on human life. Absolutely in present days education is one of the most important parts of we all humans. He has said University degree is very necessary to live happily, comfortable and meaningful life. It also provides various opportunities for jobs. It helps the career development of citizens as moving illiterate peoples to literate. Similarly, to the country and also he has said that educated people get respect from their society.

Critical thinking/ analysis

This essay is very impressive as it describes the importance of schooling. However, after reading this essay I am not fully satisfied with some statement of this text as well as the writer.

- Is only formal education is important?
- Can all the University's degree's people had a job?
- Also, they are really self-dependent without any job?
- Can all the educated people get respect from society?

In every sector, education is not given pleasure, so I am not fully satisfied.

Assimilation

Before reading this text I have not a good knowledge about the University's degree. And how and where it is useful. But after reading this essay I have known many things as well as important of schooling in our life. So, I have decided from now to read carefully my all books regularly to get a good percentage as well as CGPA.
